SUMMARY

I am a graduate of the Faculty of Veterinary Medicine, but my true passion lies in graphic design and web development. My career started as a graphic designer, where I refined my skills in visual design before transitioning into programming. I specialize in WordPress development, combining my knowledge of frontend design using HTML and CSS with backend functionality. I'm currently expanding my expertise by learning Flutter for mobile app development. I am deeply enthusiastic about programming, constantly seeking to learn and solve new challenges.
